WASHABLE KEYBOARD

debetrek

Features

The Debetrek Washable Keyboard is designed to withstand the toughest of healthcare environments, and is suitable for highly sensitive areas.

A thin membrane protects the internal components and allows you to fully immerse your keyboard in water to clean it from food, soda, coffee or any other unwanted substances (Note: USB connector cannot get wet).

Meets MIL-STD-810H Method 504.3 Contamination by Fluids testing for resistance to breakdown when exposed to cleaning and disinfecting solvents such as alcohol and bleach for at least 24 hours.

With a full sized keyboard, and 6 rows of keys including a numeric keypad, the layout is ideal for the touch typist looking for comfort and responsiveness.

Made with Antimicrobial Plastic that reduces bacteria that can cause stains and odors on the product, the keyboard provides direct and reliable connection for continuous performance and eliminates the need for batteries.

Washable Keyboard

Interface - USB
